

Ericpol Telecom – information about the company

Ericpol Telecom (ericpol.com) is the largest Polish exporter in the ICT industry, one of the major software providers for the telecommunications industry and the largest IT company in the Łódź province (2009 Rating, Computerworld TOP200). It was established in Łódź in 1991. Apart from the locations in Łódź, Cracow and Warsaw, Ericpol Group is composed of subsidiaries in Ukraine, Belarus and Sweden. At present, the whole Ericpol Group employs over 1100 people. The company operates in the area of telecommunications, rendering high-quality competitive services of outsourcing and lease of highly qualified engineering teams, as well as providing dedicated solutions and services. It specializes in four sectors:

- telecommunications (services of designing, maintenance and testing of software for hardware and software manufacturers all over the world; consultancy and training services),
- telematics (engineering services – mainly in the area of designing and testing embedded systems software, which are used by the leading manufacturers of car safety systems in M2M communication for the largest manufacturers in the car industry, i.e. Peugeot or Citroen),
- healthcare (specialist software packet „Dr Eryk” for managing doctor’s surgeries and outpatient clinics),
- business solutions - a comprehensive set of naturally integrated applications for effective business management.

For 20 years Ericpol has been providing information and communication technology solutions, and thus successfully competing on the international market. We executed over 600 comprehensive long-term projects in 70 countries.

In 2011 Ericpol – as the only Polish company - was ranked among the top 100 outsourcing companies in the world, in the group referred to as the "Rising Stars" (the ranking prepared by the International Association of Outsourcing Professionals® (IAOP®)).

Ericpol Telecom’s portfolio includes clients such as: Ericsson, Orange (France Telecom), Telecom Italia Mobile, Telefonica, Polkomtel, T-Mobile (Deutsche Telekom), AT&T, Telmex, TeliaSonera, AIS, Saigon Postel, Sprint and PTC.

The company also participates in actions aimed at promoting young Polish scientists in the area of mathematics. It regularly cooperates with academic centres of the Technical University of Łódź, the Jagiellonian University and the AGH University of Science and Technology in Kraków. Ericpol

actively participates in the didactic process of the students of telecommunications, applied mathematics and computer science through lectures and seminars, as conference sponsor and scientific research partner. As part of a project ‘Young People in Łódź’ is the founder of scholarships for the most talented students.

Additionally, the company is a member of the Radiocommunications and Multimedia Techniques Development Supporting Fund working at Technical University of Warsaw.

Ericpol Telecom - together with the Polish Mathematical Society - has initiated the International Banach Prize for the best doctoral dissertation in the mathematical sciences, which was established in 2008. The project of sponsoring the prize for talented young mathematicians by the company reflects the appreciation of the IT business for the role played by mathematics in the contemporary world. Year by year, this international initiative covers more and more European countries, such as Belarus, the Czech Republic, Estonia, Finland, Lithuania, Latvia, Norway, Poland, Slovakia, Sweden, Ukraine and Hungary. The winner of the competition receives a prize in the amount of 20,000 złoty, which is one of the highest financial prizes awarded in Poland to young scientists in the mathematical sciences.
